

MyTalkTools Reference Manual

Account Creation

You can create an account from the introduction screen when you first install the app, or you can create the account by tapping on “Author”. Using the “Author” method you would create an account and select a starter board like this, first tap “Author”...:

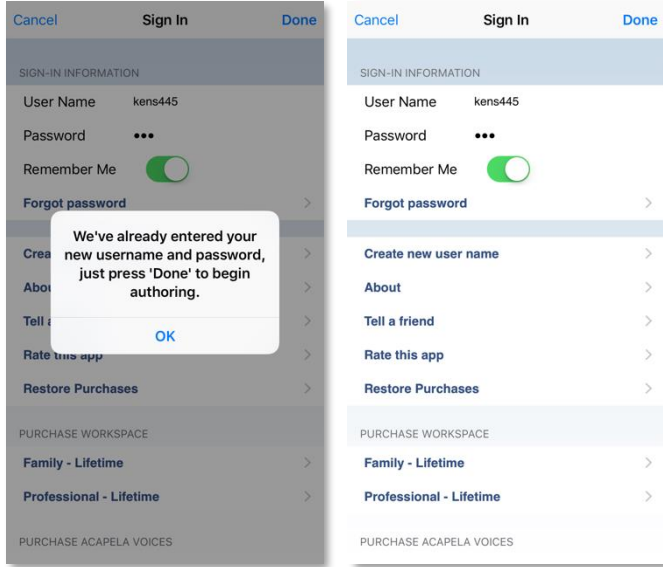

Fill in the new user name form, and tap “Done”

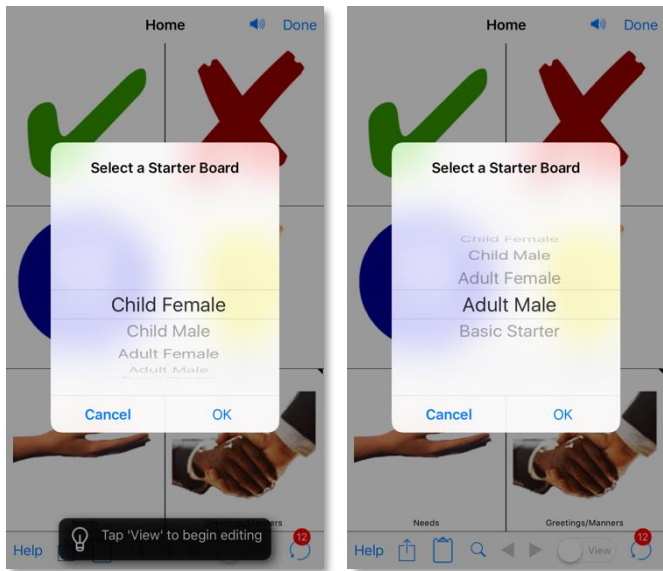

Once it indicates the account has been created, tap “Done”.

MyTalkTools Reference Manual

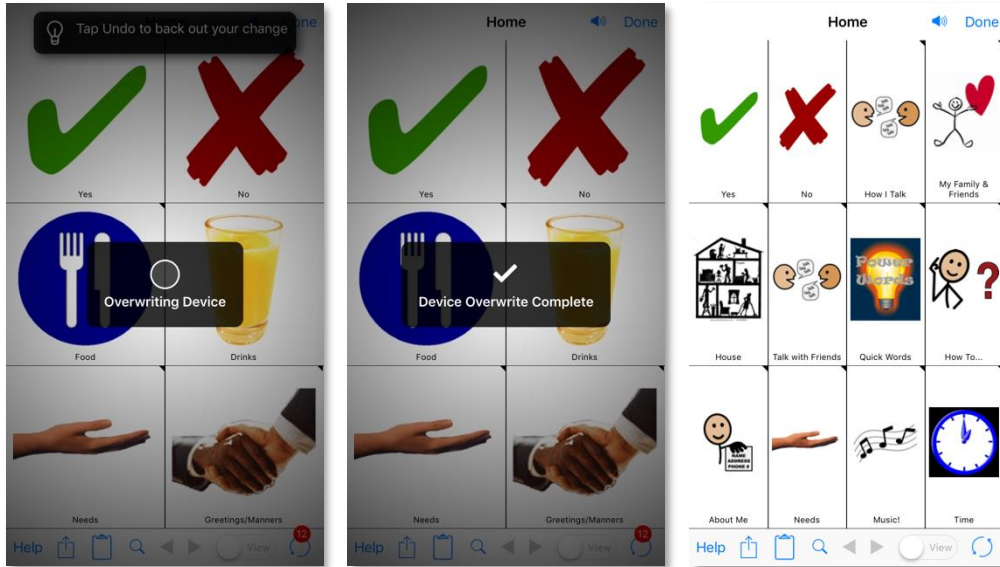

Now tap “OK”. Note that your username and password are filled in. Now tap “Done”.

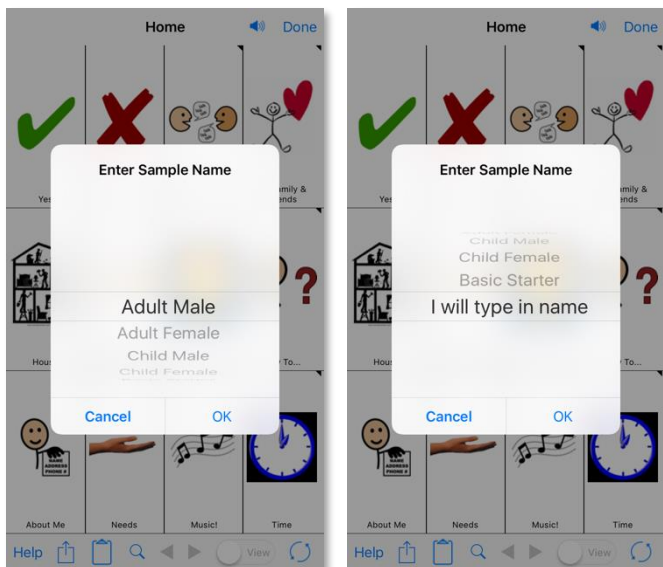

Scroll until you find a starter board that seems close to your scenario. Then tap “OK”.

MyTalkTools Reference Manual

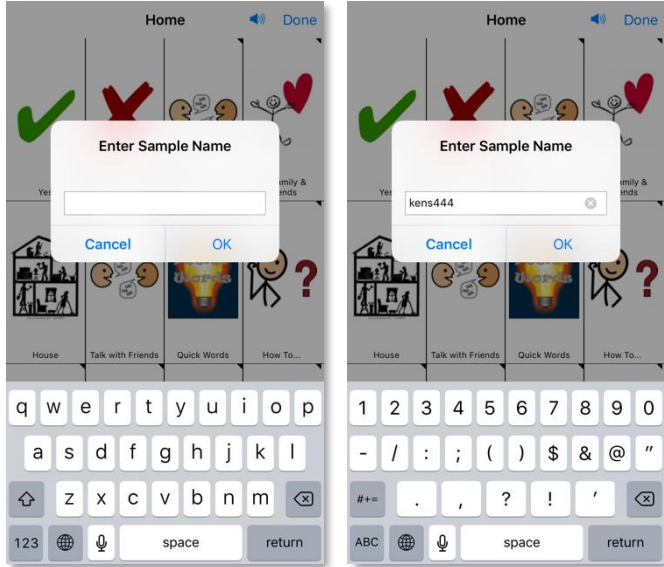

It will take a few minutes to download the content, and then you will be automatically taken to your new board.

If you want to use another account as the starter board for your new account, do it like this:

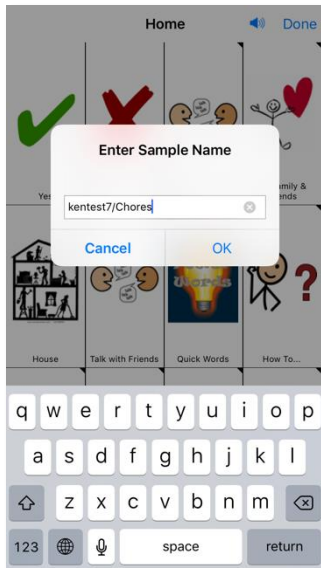

From “Enter Sample Name” dialog, scroll to the bottom, select “I will type in name” and tap “OK”.

MyTalkTools Reference Manual

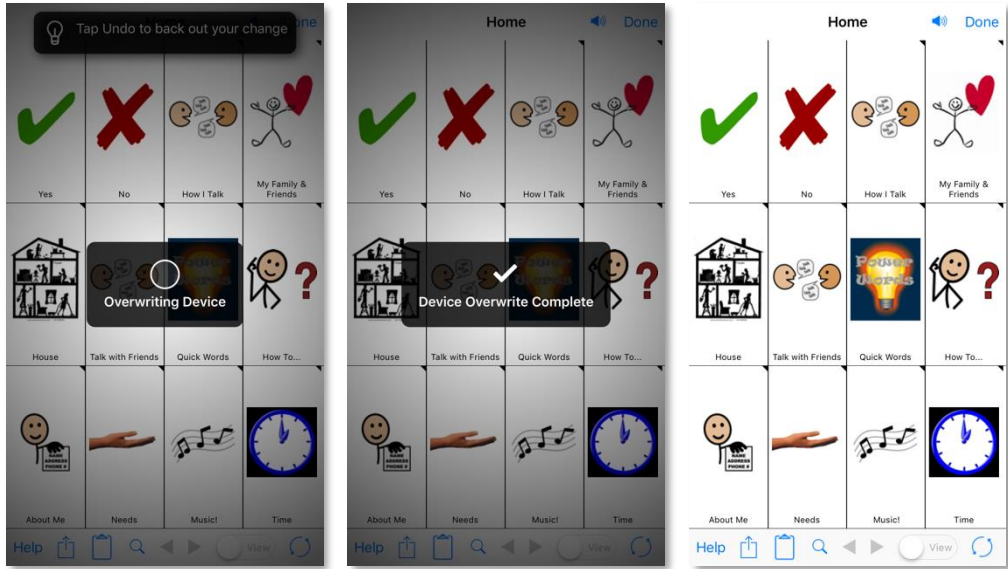

Enter the username that you were given.

If you were given 2 names, a professional username and a board name, enter them with a forward-slash between them, and pay attention to capitalization. It must be exact.

Tap "OK".
